

# SIEMENS

## **Everything you need for comprehensive fire safety**

Fire safety today requires a comprehensive understanding of needs and innovative solutions. As a leading international provider of fire safety technology, we have learned how fires work. This knowledge has contributed to the development of our innovative, high-quality fire safety products, systems, and solutions such as:

- **Fire detection**
- **Evacuation and voice alarm**
- **Extinguishing**
- **Danger management**
- **Fire safety products**
- **Fire safety services**

## Fire detection systems for every need

All of Siemens fire detection systems are scalable from small to very large, from simple to complex making them easy to expand.

### Fire protection system Sinteso – completely safe

Top level fire protection. With the Sinteso fire protection system, we offer you:

- An integral system that protects your investments
- A system based on the latest technology platform for all functions, all building types, and every form of future use

### A smart and powerful fire safety system

#### Cerberus PRO

- **Fire control panels** – they combine high security standards with latest technology
- **Fire detectors** – they ensure very fast and highly reliable detection thanks to intelligent detection technology
- **Peripheral devices** – they increase safety even further
- **Special detectors** – they cover applications from hazardous areas to high bay warehousing

## Evacuation and voice alarm systems

Buildings and infrastructures are becoming increasingly complex. Streams of customers, constantly changing employees, outside contractors and suppliers – countless people move through buildings every day. In a serious incident, the risk is very high that people will not be able to safely escape the danger zone. As a result, owners and operators of buildings are liable for what happens in their buildings. As a market leader in fire safety, security and building automation, Siemens can provide this expertise and deliver efficient solutions to meet your need
